### Interesting Notes About the Mines of a Good District.

Golden, N. M., June 24.—Prof. L. Griswold, accompanied by Mr. Fisher, of Boston, a stock owner of the Industrial Placer Mining company, are getting several hundred tons of cement from the industrial placer ground, the same will be treated in the Mayo mill.

Mr. Belcher, of Boston, also, arrived today and will also examine the industrial property, he being also interested in the same company. Mr. Belcher will try another process to determine the value of the cement beds and will find out the kind of machinery needed to save the values.

The Baird Mining company, under the able management of W. S. Rishworth, is having a shaft sunk to the 200 foot level, where the company expects to find enough water to run the thirty stamp mill now on the ground.

The McKinley company had a mill run made at Golden of thirty tons of ore, running \$18 per ton. Messrs. Hall and Lofbeck have started getting more ore. The mine is now in first class shape and will produce lots of ore.

A. Lopez is working the San Miguel mine and running his arrastra mill every day. Free gold ore has been struck in the mine as the work goes down. The present indications of the mine shows that she will be a heavy producer as depth is gained.

The James Lucas mines and mill are shut down at present. The mines are situated on the Ortiz mine grant and this ore is getting so refractory that the values cannot be saved in the free milling mill. Mr. Lucas claims that besides the sulphates the ore contains some other ingredients which makes it impossible to save more than 10 per cent of the real values.

J. E. Smith, the lumberman: Good, good; more building this season than for several years.

Price Bros. Bankers' and merchants' business a little slow this week, owing to the busy harvest of hay and grain; prospects are bright for a heavy fall trade and we expect a big season.

M. Chamber and C. E. Spelling, the grocery men: All we want to do this warm weather.

August Winkler, the city baker: Business good; I don't ever have time to go fishing this year, as I have done before.

## CHARGED WITH THEFT.

John I. Lewis, of New Mexico, in Jail at El Paso.

John I. Lewis was brought to the county jail yesterday by Officer Ryherson and locked up on a charge of theft as bailie. He was held for the day and then taken to New Mexico by the officer.

Lewis is charged with converting time checks to his own use that were entrusted in his care. The checks were issued by the Nelson Construction company.

There is also a charge of forgery pending against him. It is alleged that he signed other men's names to the checks as a means to get them cashed.

Lewis emphatically denies his guilt and states that whatever he did, he had full authority, and that he will have no trouble whatever in proving his innocence. He says he has plenty of friends and can secure all the money he desires without resorting to such means to obtain it.

However, it is said that there is strong evidence against him, and it is alleged that he has been in trouble before.—Times.

## KEEP AWAY.

Advice to Laborers to Shun Colorado Sugar Beet Fields.

A letter from John L. Stephens, for himself and four other young men of the old town of Albuquerque, to El Indio, the Spanish paper, gives a tough account of their work and treatment in the sugar beet fields of Colorado.

They were obliged to pay their railway fare, after having been promised free passage. They worked three weeks on hands and knees among the beets and when they quit they had from \$1.50 to \$3 per man. On feast days they had meat, but it caused most of them to be sick. The other day the diet was varied—canned beans and corn. Stephens and eight others quit, including Eduardo Baca, Bonifacio Lugo, Gregorio Murphy and Francisco Garcia, and went to Pueblo, where they secured work on the railroad.

Stephens in closing, warns all his young men friends, who wish to go to Colorado from Albuquerque and vicinity, to keep away from the beet fields, and that a poor man in them can never get ahead.

## BISBEE SMELTER.

It Was Barely Saved From a Big Fire.

A special dispatch from Bisbee, A. T., dated June 25, says: Fire destroyed property valued at \$12,000 near the Czar shaft. The change house was burned with the clothing of miners. The fire also destroyed the cable house where cables are made and repaired. A new water supply just in from Nacon was all that saved the entire plant and the great Copper Queen smelter. Superintendent Douglas and his assistants made a great fight. If the fire had not been checked the whole city would have been in great danger. Citizens joined employees in fighting the fire.

## LORDSBURG.

Mr. and Mrs. W. E. Armstrong were up from Sevier. Mr. Armstrong is engaged in the mercantile business at Sevier in partnership with J. D. Weems.

John Roligan came near to death the other day. He was at work in his well about thirty feet deep when a piece of board about two feet long dropped down. It is not known whether the board hit the ladder, and so had its speed arrested, or hit him a glancing blow. It did hit him on the head, cutting a slash about four inches long and knocking him out. If the board had hit straight and hit him square, it would have crushed his skull. A Mexican who was working with him went down the ladder tied a rope around him and brought him up. He was brought to town, where the doctor sewed him up, and the next day he was back to the well at work again.

## CARLSBAD.

From the Arizona.

Mrs. George Lucas was brought down from Roswell, suffering from a release of peritonitis. For several months past she has been critically ill with that disease, but when she left for Roswell seemed to be convalescing nicely. Her condition is very serious.

Reports from Rocky Arroyo state that Monday evening's rain and hail storm did much damage in that section, killing turkeys and chickens and

utterly demolishing the fruit crop. The trees themselves were badly torn and shattered, and there is hardly enough fruit left to make a pie. This section seems to be about the only sufferers from the storm, the hail being small and harmless which fell about Carlsbad and the adjoining section south of here.

A heavy rain storm, with a hail accompaniment, struck this section late Monday afternoon, and gave the country a much-needed, though soaking, shower. The hail was not large and did very little damage to fruit, though it broke a few skylights. Hackberry Draw and Rocky Arroyo were very high, the former flooding several houses in the southern part of town, forcing the residents, in some instances, to wade out. Rocky is stated to have reached the highest flood point in its history. However, the good accomplished by the downpour far out-weighs the slight harm done, and farmers and stockmen are smiling contentedly.
